Print Excel Refresh	1	💷 👩 😥 🗐 👸 🚹 Add Injury New Save	Close

The screen defaults to all injured athletes. You can filter the list to include, Kiosk Logins, Portal Logins, Today's appointments, by Team/Season, Organization, you can search by only your injured, or filter by default injury.

To navigate the screen, choose the filter and hit Load Records. That will load the list of athletes into the box on the left. Select the athlete from the list, and select the injury from the drop down injury tab. If there are more than one, hit the Green Load Info button to pull the information for that specific injury. The tabs correlate to the type of documentation to be done. They also tie to the N,M,R,L,S,T,E,F boxes; once a note is entered, a check mark appears in the box that relates.

Other functions that can be accessed/completed through the Daily Information Screen:

*Add a new injury, or quick injury

*Make related information private

*Send Secure Messages

*Copy a note, modality, rehab or other from the last entry

ATS: Daily Information Entry Screen Overview

The **N** correlates to the tab. You Notes can complete any available note in this section. You can mark it private, utilize tags note and key phrases, as well as email the note to email group for the athlete. You are not limited to one note, simply select new to start a new one, after saving. You are also able to add a Default injury, or a quick injury for an athlete, if needed. Use the green load info button if you need to navigate between injuries.
