Highlighted Features

Hydration Alert Log (HAL)
- Enter starting & ending weights; then “calculate”
- Set 2 warning levels for weight change
- Monitor whole teams or individuals
- Data entry via tablet, phone or PC/Laptop

Secure Messaging
In accordance with the NATA “Best Practices Guidelines for Athletic Training Documentation” messages section we are happy to provide the ability for staff to securely communicate with athletes in an encrypted & logged manner.

Data Miner
In addition to the 400+ reports in ATS we also have a “Data Miner” available so your administrator, or users if given access, can select & export data to Microsoft Excel.

Concussions
We believe that there is no such thing as “too much” information for evaluating & treating concussions. To that end we have a variety of information available in ATS; including the SCAT5, BESS, SAC & more.

Private Records
There is a growing need for an additional layer of security for information...marking them "private" for situations such as mental health issues. ATS includes this in a variety of areas.

Third Party Billing
As the industry continues to change and Athletic Trainers are able billing becomes more important. ATS has partnered with a company to help our clients move into this area as needed.

Total startup cost $1,635.00

Prices are in US Dollars and are subject to change

* For ATS purposes; a "user" is defined as someone entering or updating information. This typically includes athletic trainers and strength/conditioning coaches

* It does not include anyone with read-only access rights, students or doctors.

** 1-time purchase is a license to use the ATS Software as long as the annual fees are maintained.

* Annual Support is included in the hosting fee
* On-site installation is not included
* Initial purchase includes 2 hours of training via a GoTo meeting
* One-time purchase price is non-refundable
* Customers outside of the United States must "Self Assess" and pay any applicable taxes
A number of our clients have asked about being able to use a “Dashboard” or some other method to pull #’s quickly and easily. Below is our “ATS Dashboard” that we feel takes this to another level...allowing for date ranges and other criteria to be used.

Export the statistics to Microsoft Excel
Copy the statistics to the Windows clipboard
Filter & change the criteria for calculations
Filter by Team, Organization, Region or User using the drop-down choices
Change the start/end dates and “calculate” statistics for any date range...
Two of our goals with ATS are to save Athletic Trainers time and money while making data entry as easy as possible. Along these lines we are happy to give our clients the ability to use QR codes to create labels and also ID cards.

With our QR code process clients can create their own ID cards that can be used with a QR reader to automate the login process in BOTH the ATS Kiosk Windows and ATS Kiosk Web modules...

Our QR code screen allows our clients to customize the content for their QR Codes. Depending on the amount of information used labels can be printed in one of two sizes.
Like the other parts of ATS we have made the billing process flexible and user-friendly while making data entry as quick & easy as possible.

- Rehabs & Modalities are entered by your medical staff
- Claims are created using our claim utility
- Claims are submitted for payment by our billing partner
- An eFile, HCFA-style, copy of the claim information sent is saved in the injury and athlete area(s).

ATC Round Table with ATS...

Basic Overview:

- Web meeting every 2 months; approximately 1 hour
- 2 meetings/day; 10:00am EST, 2:00pm EST, others TBD
- 1st 15 people to sign up for each meeting get a spot; additional meetings will be added as needed
- ATS will moderate; meetings will include:
  - Ideas submitted by ATCs prior to the meeting
  - Roughly organized by ATS
  - “What’s new” or “coming soon” from ATS
  - Open discussion of the topics
  - These will include “guest speakers” from time-to-time

Why are we doing this?

- We have always encouraged & welcomed ideas. In addition to email/phone communication this provides a “live” forum for that purpose
- If there are things we could be doing differently...or better; we want to hear the ideas and discuss them; see how we may be able to address them...or not
- It gives the ATCs we work with a forum to discuss ideas and/or news that is industry-related
- This helps us continue to learn about ongoing/upcoming things as well.
