

The Athletic Trainer System®

Private Information

A growing number of our clients have asked about a way to make a record (e.g. injury) “Private”. Typically this is for a mental health issue or other conditions requiring a higher level of confidentiality from typical injuries. This is a growing area for sports-related EMRs; and working directly with student health. This document gives a quick overview of how we have addressed this in our ATS software.

- ☑ The ability to enter/see private records is limited on a user-by-user basis.
- ☑ Additional information is then entered/tracked.
- ☑ Private information will not be shown on reports.

The type of information that can be marked as “private” includes:

- Injuries
- Medical services
- Medicine distribution
- Referrals
- Notes
- eFiles
